VAN LANSCHOT KEMPEN

Press release

Van Lanschot Kempen reports 30% rise in first-half profit

Amsterdam/'s-Hertogenbosch, the Netherlands, 27 August 2026

- **Strong net inflows into assets under management (AuM) of €19.5 billion (Private Clients Netherlands: €1.5 billion, Private Clients Belgium: €0.2 billion, Investment Management Clients: €17.8 billion)**
- **AuM up 18% to €188.2 billion and client assets up 16% to €209.1 billion**
- **Net profit rose 30% to €88.2 million, with commission income up 10% to €306.9 million and interest income up 27% to €96.9 million**
- **Cost/income ratio improved to 66.4% as focus remained on scalable growth**
- **Capital position is strong, with a CET1 ratio of 17.0%**

Maarten Edixhoven, Chair of the Management Board, said:
"In the first half of the year, we delivered strong results through the successful execution of our strategy. New and existing clients entrusted us with significantly more of their wealth, both in private banking and in fiduciary management for pension funds. To us, this confirms that clients value our personal approach, expertise and long-term focus. We achieved scalable growth, as demonstrated by our improved cost/income ratio.

"In the second quarter, financial markets recovered from the sharp movements seen in March, despite continuing geopolitical uncertainty.

"Assets under management (AuM) grew by 18% to €188.2 billion. Private Clients Netherlands recorded strong net inflows of €1.5 billion and positive market performance, resulting in 12% growth in AuM compared with year-end 2025. Around two-thirds of the net inflows were driven by investments from new clients. In Belgium, AuM grew by 6%, supported by net inflows of €0.2 billion and positive market performance.

"Investment Management Clients, which manages assets for pension funds among other clients, recorded net inflows of €17.8 billion. In the first half of the year, Dutch pension funds Stichting Pensioenfonds voor de Woningcorporaties and Stichting Pensioenfonds Haskoning Nederland selected Van Lanschot Kempen as their fiduciary manager.

"As a result, our total client assets exceeded €200 billion for the first time. This is an important milestone for Van Lanschot Kempen, and a sign that more clients are choosing us to help preserve and grow their wealth.

"Net profit rose by 30% to €88.2 million, compared with €67.8 million in the same period last year. This was mainly due to growth in commission income (+10%) and interest income (+27%). Based on current market conditions, we are raising our full-year interest income guidance from €180–195 million to around €200 million. Disciplined execution of our strategy improved our cost/income ratio to 66.4%, from 71.8% a year earlier. This shows that we are combining growth with an increasingly efficient organisation.

"Over the past six months, we have continued to deliver on our 'Growing further together' strategy. This centres on generating scalable, profitable and sustainable long-term growth while maintaining a capital-light balance sheet. We have turned this strategic focus into action through a range of initiatives.

"Within Private Clients Netherlands, we are increasingly supporting clients with a combination of investing and financing. This is reflected in the growth of our loan portfolio. In the first half of the year, we further developed our wealth management lending product to meet growing client demand. In Belgium, we further strengthened our organisation and Mercier Van Lanschot was named 'Best for High Net Worth' at the Euromoney Private Banking Awards 2026.

"Alongside these investments in private banking, we also expanded our private markets offering, with total AuM in private markets solutions growing to €6.5 billion. In July, we secured $120 million in commitments from private banking clients for our second North American private equity fund. More than €180 million was also committed to our new fund investing in existing private equity portfolios, known as secondaries. Since 2018, we have introduced six private equity funds. These funds give clients access to investments that were previously often available only to institutional investors. Our liquid investment strategies also saw positive momentum, with net inflows of €0.3 billion in the first half of the year. To accelerate this growth, we are exploring potential strategic partnerships for these liquid investment strategies.

"The planned joint venture with KBC Securities for our equities activities remains on track to launch in the fourth quarter. This partnership will give clients access to broader Benelux equities research, pan-European expertise in real estate and life sciences, and improved trading liquidity. It will also broaden our reach among investors for transactions including equity offerings.

"As we continue to build scale and deepen our expertise, strong client relationships remain the foundation of our success. In June, we were recognised in the UK as 'Fiduciary Manager of the Year' at the UK Pensions Awards for the third year running. Satisfaction among our private banking clients in the Netherlands improved in the first half of the year, with Private Clients Netherlands' Net Promoter Score (NPS), which measures how likely these clients are to recommend us, rising to 45. Clients particularly value the combination of expert advice and personal conversations about their financial future. That is what sets us apart.

"We continue to broaden the use of technology to further strengthen our client service. By organising routine work more intelligently, we create more time for personal contact and value-adding advice. That's why private bankers and colleagues from our digital teams are working together closely on AI-enabled tools that help us serve clients even better. Our approach was recognised for the second year running at the PWM Wealth Tech Awards 2026, part of the Financial Times. Van Lanschot Kempen received three awards, including 'Best Digital Private Bank in the Netherlands' and 'Best Private Bank for Digital Innovation in Europe'.

"In the second half of the year, we will further invest in growth and in our service to clients. I'm particularly looking forward to the opening of our new Amsterdam office in the fully renovated Breitner Center. At the end of this year, we will welcome clients and colleagues there in a modern, personal environment that meets the highest sustainability standards.

"Our results put us firmly on track to achieve our 2027 financial targets. More importantly, we are continuing to build an independent specialist wealth manager that grows and innovates while remaining firmly focused on our clients and the society around us. Our progress is only possible because of the trust of our clients and the commitment of our colleagues. I would like to sincerely thank them for that."

AuM and client assets

Van Lanschot Kempen delivered strong growth in the first half of the year, with net inflows into assets under management (AuM) of €19.5 billion. Equity markets ended the first half on a positive note, resulting in a market performance of €9.8 billion. Amid sharp market volatility caused by the conflict in the Middle East, continued investment in technology and AI remained an important driver of financial markets. Client savings fell €0.5 billion, as a proportion got converted into investments. Assets under administration (AuA) grew by €0.3 billion, primarily from new clients of Van Lanschot Kempen's service for independent wealth managers.

Capital and liquidity

The CET1 ratio according to the "Basel IV fully loaded" definition is strong at 17.0% (2025: 18.2%). The decline relative to the end of 2025 was mainly driven by the capital return of €0.80 per share in June 2026 and an increase in the total risk exposure amount, primarily due to growth in the lending portfolio. The minimum mortgage risk-weight floor imposed by De Nederlandsche Bank (DNB) will be discontinued after 30 November 2026. At 30 June 2026, this floor had a negative impact of approximately 1.3 percentage points on the CET1 ratio. It remains Van Lanschot Kempen's intention to return to shareholders the portion of capital that exceeds the targeted 17.5% CET1 ratio if this ratio is expected to clearly exceed its target by year-end.

[1] At 31/12/2025 including retained earnings. At 30/06/2025 and 30/06/2026 excluding retained earnings.
[2] Return on CET1 capital and return on equity are calculated based on underlying (annualised) net results attributable to shareholders.

2026 half-year results

Net profit amounted to €88.2 million in the first half of the year, an increase of 30% compared with the same period last year. This was primarily driven by a 10% increase in commission income and a 27% rise in net interest income. The cost/income ratio improved to 66.4% (H1 2025: 71.8%), outperforming our target range of 67-70%.

Securities commissions were boosted mostly by higher average AuM levels on continued steep net inflows and supported by strong market performance. Other commissions declined due to lower revenues from M&A and equity capital market transactions.

Interest income increased to €96.9 million, primarily driven by balance sheet growth and higher interest margins. For the full year, we expect net interest income to exceed the previously communicated guidance range of €180–195 million. Based on current market conditions, we anticipate net interest income of approximately €200 million for full-year 2026.

The loan portfolio increased to €9.9 billion (2025: €9.6 billion) due to a rise in both mortgages and other loans to private banking clients. During the first half, additions to loan loss provisions amounted to €3.0 million.

Operating expenses include continued investments in further growth. Staffing costs were up, mainly reflecting an increase in FTE numbers from 2,072 at the end of June 2025 to 2,165 a year later. Growth was concentrated primarily within our Private Banking and Private Markets Solutions teams. In addition, the fixed salaries of employees in the Netherlands were raised by a general salary increase of 3.6% as of 1 January 2026. Other administrative expenses rose by 6%, reflecting additional investments in IT.

– Savings and deposits	11.1	11.5	-4%	10.5	6%

Income from Private Clients Netherlands grew by 22% compared with the first half of 2025. This was primarily driven by a 36% increase in interest income. In addition, commission income rose by 15%, supported by higher average AuM levels and growing demand for investment advisory and wealth management services. Costs remained well controlled and increased by 5%, mainly due to the expansion of our teams to serve a growing number of clients. The cost/income ratio improved to 59% (H1 2025: 69%).

Net AuM inflows in the segment were strong, amounting to €1.5 billion, some two-thirds of which derived from new clients, underlining the appeal of Van Lanschot Kempen's proposition. Discretionary wealth management accounted for 38% of these inflows, compared with 52% in H1 2025. The margin on AuM, including Evi, increased slightly to 55 bps in the first half of 2026 (2025: 54 bps).

Client satisfaction remained high, with a Net Promoter Score of 45 in the Netherlands (2025: 43). Clients particularly value the segment's personal approach, wealth planning capabilities and digital investment services.

Total AuM at Evi grew to €8.0 billion (2025: €7.3 billion), mainly driven by positive market performance. In the first half of 2026, Evi further expanded its pension offering with the introduction of a pension payout solution, enabling clients to manage their retirement assets throughout both the saving and payout phases within a single platform.

In Switzerland, the focus remained on clients seeking international expertise and geographical diversification of their wealth. Total AuM for the activities in Switzerland increased by 10% to €3.6 billion (2025: €3.3 billion), driven by positive market performance and net inflows.

Private Clients Belgium delivered strong financial results in the first half of 2026. Commission income grew by 18%, driven by higher AuM levels. To support its growing client base, Private Clients Belgium grew its organisation and made further investments in IT solutions for clients. This led to a 22% increase in its operating expenses. The cost/income ratio was strong at 50%.

Net inflows in the segment amounted to €0.2 billion and were driven by new clients in discretionary wealth management. Its market performance contributed €0.7 billion, bringing total AuM to €18.4 billion – an increase of 6%. The margin on AuM rose to 83 bps in the first half of 2026 (2025: 81 bps).

Investment Management Clients delivered a strong performance in the first half of 2026. This built on the investments made in recent years in expertise, client service and scale. These investments translated into growth in activities, further improvements in profitability and a strong increase in results. Commission income grew by 7%, driven in particular by rising income from fiduciary management and private markets. Operating expenses remained well controlled, resulting in an improved cost/income ratio of 78% (H1 2025: 82%). Profit before tax increased by 30%.

To further enhance scalability, investments in IT solutions continued. Preparations for the migration to Amundi Technology's ALTO platform, an advanced middle- and back-office solution, are well underway. Client reporting and the underlying processes were also further strengthened.

Total AuM increased by 24% to €116.0 billion on the back of net inflows of €17.8 billion and a positive market performance of €4.7 billion. Due to the changing AuM composition, with a larger share of fiduciary management, the average AuM margin declined to 13 bps in the first half of 2026 (2025: 14 bps).

Liquid investment strategies saw net inflows of €0.3 billion, mostly due to inflows into the segment's credits and dividend strategies.

Investments were made in the further expansion of the illiquid investment offering. Net inflows in private markets solutions[3] amounted to €0.2 billion and were driven by inflows into private debt, private real estate and the drawdown of committed capital within private equity strategies. Total AuM in private markets reached €6.5 billion, with an additional €1.5 billion in client-committed capital.

Fiduciary management achieved net inflows of €17.2 billion, primarily driven by the mandate from Stichting Pensioenfonds voor de Woningcorporaties, representing €15 billion in AuM, and the mandate from Stichting Pensioenfonds Haskoning Nederland, representing €1.3 billion in AuM. These mandates demonstrate Investment Management Clients' strong position as a strategic partner for pension funds. In addition, the transition to the new Dutch pension system (WTP) was successfully completed for three fiduciary clients, while preparations for upcoming implementations continued. Through these efforts, clients are being actively supported in one of the Dutch pension sector's most significant transformations.

Investment Banking Clients recorded an operating result before tax of -€4.4 million for the first six months. Commission income declined to €16.9 million, reflecting lower activity levels in M&A and equity capital market transactions. Thanks to the segment's continued disciplined cost management, operating expenses remained in line with the previous year.

Preparations for the transfer of the specialist equities activities into a 50/50 joint venture with KBC Securities remain well on track. The transaction is expected to be completed in the fourth quarter of 2026.

Client assets	**1.2**	**1.2**	**6%**	**1.1**	**9%**
– AuA	0.9	0.8	12%	0.7	26%
– Savings and deposits	0.4	0.4	-6%	0.4	-18%

The Other segment achieved an operating result before tax of -€12.5 million in the first half of the year. The segment comprises activities that are not directly attributable to the client segments, including the management book, structured products and staff departments, as well as the activities of participations. The lower result compared with the first half of 2025 was primarily driven by one-off expenses related to the new office in Amsterdam.

Performance report / presentation / conference call

For a detailed discussion of Van Lanschot Kempen's results and balance sheet, please see our performance report and presentation on the 2026 half-year results at vanlanschotkempen.com/results. In a conference call on 27 August at 9:00 am CEST, we will discuss our 2026 half-year results in greater detail. This can be followed live at vanlanschotkempen.com/results and will be available for playback later.

Financial calendar

17 September 2026	Extraordinary general meeting
30 October 2026	Publication of third-quarter 2026 trading update
24 February 2027	Publication of 2026 annual results

Important legal information and cautionary note on forward-looking statements

This press release may contain forward-looking statements and targets on future events and developments. These forward-looking statements and targets are based on the current insights, information and assumptions of Van Lanschot Kempen's management about known and unknown risks, developments and uncertainties. Forward-looking statements and targets do not relate strictly to historical or current facts and are subject to such risks, developments and uncertainties which by their very nature fall outside the control of Van Lanschot Kempen and its management. Actual results, performances and circumstances may differ considerably from these forward-looking statements and targets.

Van Lanschot Kempen cautions that forward-looking statements and targets in this press release are only valid on the specific dates on which they are expressed, and accepts no responsibility or obligation to revise or update any information, whether as a result of new information or for any other reason.

Van Lanschot Kempen's quarterly accounts are prepared in accordance with International Financial Reporting Standards, as adopted by the European Union ("IFRS-EU"). In preparing the financial information in this press release, except as described otherwise, the same accounting principles are applied as in the 2025 Van Lanschot Kempen consolidated annual accounts. The figures in this press release have not been audited. Small differences are possible in the tables due to rounding. Percentages are calculated based on unrounded figures.

This press release does not constitute an offer or solicitation for the sale, purchase or acquisition in any other way or subscription to any financial instrument and is not a recommendation to perform or refrain from performing any action. Elements of this press release contain information about Van Lanschot Kempen NV within the meaning of Article 7(1) to (4) of EU Regulation No. 596/2014.

This press release is a translation of the Dutch language original and is provided as a courtesy only. In the event of any disparities, the Dutch language version will prevail. No rights can be derived from any translation thereof.
